

# FIRE MANAGER ADVANCED CERTIFICATE

**Designed for holders of a Fire Technician qualification to upgrade to Associate membership of the Institute of Fire Safety Managers (AIFSM)**

*“Vulcan has been working in partnership with us since 2005 to provide corporate fire training to our head office based team. Much progress has been made to improve our legislation compliance, management and policy interpretation. Vulcan is a key partner for our Corporate Fire Safety Team.”*

*Stuart Rogers  
Fire Safety Manager  
Marks & Spencer*

## INTRODUCTION

Improved standards of Fire Safety are becoming an area of increasing concern for industry, commerce and other workplaces. Current fire safety legislation requires a risk based regime in organisations with a nominated competent person overseeing the fire safety management responsibilities.

The programme is designed for holders of a Fire Technician qualification, ie, TechIFSM, TIFPO, TFireE etc, upon successful completion of the course and project, to enhance their professional standing to Associate (AIFSM) with the Institute of Fire Safety Managers who have accredited the course.

The project produced is should be a working document useful in your workplace, not just a course exercise.

## ABOUT THE COURSE 5 Day plus Project

- Fire Safety Provision Advanced
- Fire Risk Assessment Advanced
- Managing Fire Safety Advanced

### Fire Safety Management Project

Compile 10,000 word paper on fire safety in an organisation including:
