

FIRE MANAGER CERTIFICATE

Modules 1 (5 Days) and Module 2 (4 Days) leading to Fire Technician Qualification
Public and In-house options

“Vulcan has been working in partnership with us since 2005 to Provide corporate fire training to our head office based team. Much progress has been made to improve our legislation compliance, management and policy interpretation. Vulcan is a key partner for our Corporate Fire Safety Team.”

Stuart Rogers
Fire Safety Manager
Marks & Spencer

Very informative course. Lots of detailed information relayed at a good pace.

Graham Findlay
Norse Commercial

“Vulcan has had a significant impact in providing fire safety management training for delegates from industry, commerce and other organisations. Vulcan has an impressive balanced fire training portfolio and the IFSM were pleased to grant ‘Approved Centre’ status to them.”

Stuart Cocking Accreditation
Secretary of the Institute of Fire Safety Managers

INTRODUCTION

Current fire safety legislation requires a risk based regime in organisations with a nominated competent person overseeing fire safety management responsibilities.

This course has been designed specifically for individuals employed in industry, commerce and organisations who have been given the responsibility of managing fire safety in their workplace.

This course is **Accredited by the Institute of Fire Safety Managers (IFSM)**.

For those who only require a comprehensive Fire Risk Assessment course Module 1 can be taken as a stand-alone module.

ABOUT THE COURSE

A highly practical course of study, consisting of 2 Modules, using multi-media presentations, working on plan drawings and practical exercises.

It covers all the essentials required to implement an effective fire safety management system to satisfy the requirements of current legislation.

WHAT'S INCLUDED?

Fire Safety Management toolkit and scale ruler
First class training and instruction
Comprehensive course notes
Use of laptops

Free computer software for:

- Fire Risk Assessments
- Fire Records
- Fire Inspections
- Fire Emergency plans
- Fire Guides

Lunch and refreshments each day on public courses.

“As a health and safety professional I attend numerous courses - this is most definitely one, if not the best I have ever attended.” Thank you.”

*Mick Stallard
ISG*

“The course has been very beneficial and invaluable in my job. The trainer knew what he was talking about. The notes are a very good point of reference. I have no difficulties in recommending Vulcan.”

*Jim Hill
Health & Safety Officer
Dept. for Employment and Learning, NI*

“The trainer’s laid back manner and knowledge has a way of making the information sneak up on you so you’re learning vast amounts without even realising it - Great. Trainer’s knowledge of the subject is mega.”

*Peter Nichol
Chubb Fire*

“The 9 day course provides a good underpinning knowledge for fire risk assessment and facilitates entry into the IFSM professional body at Technician grade. The course is endorsed by the British Fire Consortium as part of its progressive member training programme.”

*Ken Day
Institute of Fire Safety Managers and British Fire Consortium*

WHO SHOULD ATTEND?

Facilities Managers, Health and Safety practitioners and those looking for a framework for conducting fire risk assessments and compiling fire emergency plans. Those with very little or a good working knowledge of fire safety will benefit from this training.

QUALIFICATION ACHIEVED

On successful completion of the course exam, delegates will be awarded the Joint **IFSM/Vulcan Fire Manager Certificate** also endorsed by The British Fire Consortium and ELC approved by MOD.

WHAT WILL I BE ABLE TO DO AFTER THE COURSE?

On completion of the course you will be better able to:

- Interpret fire safety legislation and its requirements.
- Implement an effective fire safety management structure
- Identify any fire safety management deficiencies
- Confidently conduct effective fire risk assessments
- Compile fire emergency plans
- Maintain fire record documentation
- Organise fire warden schemes
- Choose which fixed fire systems are suitable for workplaces
- Apply for Fire Technician membership

EXAMINATIONS

Multi-choice examination paper and open book examinations on fire risk assessment and fire safety report writing from plan drawings and case history.

Delegates discussing a fire risk assessment solution to a plan exercise.

COURSE CONTENT

Module 1 (5 Days)

Fire Risk Assessment

Fire safety inspections and audits
Fire safety risk assessments
Identifying hazards
People at risk
Removal or reduction of hazards
Improving fire safety provision
Recording risk assessments using computer based risk assessment software
Compiling a fire emergency plan

Fire Safety Provision

Means of escape
Fire safety engineering
Fire resistant construction
Fire, heat and smoke spread
Occupancy levels
Travel distances
Staircase designs
Emergency lighting
Doors on escape routes
Automatic door release
Access for fire fighting purposes
Portable fire extinguishers and blankets
Fire warning systems and maintenance
Automatic fire detection
Construction fire safety

Module 2 (4 Days)

Fire Science

Heat, temperature, specific and latent heat
Methods of fire spread
Flash point
Explosions
Vapour cloud explosions
Methods of extinguishing fires
Fire classification

Fire Safety Management

Report writing
Fire safety legislation
Fire safety management systems
Record keeping
Inspections
Fire Awareness and Induction training
Fire Wardens
Fire evacuations
Flammable substances
Gas cylinders
Arson investigation
Fixed Installations e.g. Sprinklers, drenchers, water spray, wet & dry rising mains, hose reels, foam fixed systems, fire hydrants, smoke control facilities
Pre-fire planning for workplace to produced and emergency pack for fire service use.
