

CONVERSION COURSE TO FIRE MANAGER CERTIFICATE

The Fire Manager Certificate is awarded to candidates who have successfully completed the NEBOSH Cert in Fire Safety and Risk Management and this Conversion Course.

“After attending many Fire Risk Assessor courses and completing the NEBOSH Fire and Risk Management Certificate, I have covered subjects on this course other providers have not even mentioned. Brilliant, well organised and run course. Thank you.

*Neil Smith
Erewash Borough Council.*

“Good course. An extremely enjoyable week.”

*Andrew Kirkman
New College Stamford*

“Vulcan has had a significant impact in providing fire safety management training for delegates from industry, commerce and other organisations.. Vulcan has an impressive balanced fire training portfolio and the IFSM were pleased to grant ‘Approved Centre’ status to them.”

*Stuart Cocking Accreditation
Secretary of the Institute of Fire Safety Managers*

INTRODUCTION

Vulcan have included in its fire portfolio a cost effective conversion course for holders of the NEBOSH Certificate in Fire Safety and Risk Management to achieve a professional qualification with the Institute of Fire Safety Managers (IFSM).

On successful completion of the Conversion Course examination candidates will be awarded the Fire Manager Certificate.

This course is Accredited by the Institute of Fire Safety Managers (IFSM).

An opportunity for Health and Safety professionals to obtain a Professional Fire Safety Qualification in line with responsibilities imposed by the Regulatory Reform (Fire Safety) Order 2005 and the Fire (Scotland) Act 2005.

ABOUT THE COURSE

A highly practical 5 day in depth course with multi-media presentations, working on plan drawings and practical exercises, held as a public or in-house course with up to 12 employees.

The course mirrors Module 1 of the Fire Manager Certificate giving delegates the opportunity to apply for Fire Technician grade with the IFSM.

WHAT'S INCLUDED?

Fire Safety Management toolkit and scale ruler
First class training and instruction
Comprehensive course notes
Use of laptops.

Free computer software for:

- Fire Risk Assessments
- Fire Records
- Fire Inspections
- Fire Emergency plans
- Fire Guides

Lunch and refreshments each day on public courses.

“After completing the NEBOSH fire course, I wanted a more in-depth understanding of fire safety management. The course was well planned and structured, I would recommend this course to anyone wishing to get a more in depth understanding of the requirements of the Fire Safety Order 2005. The trainer made the course interesting and enjoyable. The pace was just right and the other candidates and I found the whole experience first class.

Bill Richardson
Outreach 3way

Delegates working on a fire risk assessment report

“Vulcan provided prompt attention and kept me informed throughout. The delivery of the course was interesting and enjoyable. It makes such a pleasant change when listening to someone who obviously is very knowledgeable in the subject without being pretentious and can provide accurate information clearly and communicate at all levels.”

Alan Brown
Act Safely

“The Conversion Course provides a good underpinning knowledge for fire risk assessment and facilitates entry into the IFSM professional body at Technician grade. The course is endorsed by the British Fire Consortium as part of its progressive member training programme.”

Ken Day
Institute of Fire Safety Managers and British Fire Consortium

WHO SHOULD ATTEND?

Successful candidates on the NEBOSH Certificate in Fire Safety and Risk Management looking for a nationally recognised fire safety manager qualification.

QUALIFICATION ACHIEVED

On successful completion of the course exam, delegates will be awarded the Joint IFSM/Vulcan Fire Manager Certificate also endorsed by The British Fire Consortium and ELC approved.

Successful candidates will be able to apply for Technician Grade Membership with the Institute (TIFSM).

WHAT WILL I BE ABLE TO DO AFTER THE COURSE?

On completion of the course you will be better able to:

- Interpret fire safety legislation and its requirements.
- Implement an effective fire safety management structure
- Identify any fire safety management deficiencies
- Confidently conduct effective fire risk assessments
- Compile fire emergency plans
- Give advice on construction site fire safety requirements
- Maintain fire record documentation
